

## How to check whether the dongle driver is installed successfully?

Answer:

- (1) Plug in the dongle
- (2) Open Device manager, and check if there is an entry Smart card reader. If not, the driver hasn't been installed properly.

Before checking, you must make sure the dongle and the USB port have no problem.

\*\*Make sure the dongle light is on when it is plugged in to the pc.

You may also check on devices and printers, and look for:
